VokBIL

developed by VOKESO

Generate recurring subscription invoices with VokBIL, an extension for Microsoft Dynamics 365 Business Central.

Functionality	Description
Price list	Sales price and purchase price for subscriptions
Subscriptions list	List of subscription cards that can be billed to customers
Commitment cycle	Either open commitment or monthly, yearly, three years, etc.
Pricing base	Specify a unit price for a pricing base such as monthly that can later be multiplied by a billing cycle such as quarterly
Billing cycle	Three years, two years, yearly, biannual, quarterly, monthly, biweekly, weekly
End-of-month dates	Proper end-of-month invoice dates when applicable
Professional invoices	Sales invoice lines appear below their category names; subscriptions can have period start and end dates, units of measure and comment lines
Bilingual descriptions	Describe your price list in two languages for your users and customers
Payment terms	Payment terms can be different from those on the customer card
Subscription document	In the customer ledger entries, filter documents based on a checkbox
End of recurring billing	Stop a subscription's recurring invoices after a date you specify
Renewal management	See renewal information such as an anniversary date
Customer aliases	Specify the customer's alias used by the subscription's vendor
Purchasing information	Identify purchase prices and vendors or an entity that has no vendor card
Generate invoices	Select one or several subscriptions and click on a button; all the invoices automatically have their own correct date
